| Current | A Non-volatile Memory Friendly Garbage Collector
Explore assumption mismatches between existing garbage collectors and emerging Intel Optane DC persistent memory. Attempt to improve the GC performance on NVM to a comparable level of DRAM. |
| Nov 2017 - Jul 2018 | ScissorGC: Scalable and Efficient Compaction for Java Full Garbage Collection
Solve the region dependency problem and improve object copying efficiency in ParOld GC with up to 5.6X GC throughput improvement and 61.8% application speedup.

OpenJDK Patch: https://bugs.openjdk.java.net/browse/JDK-8220465 |
| Oct 2016 - Oct 2017 | Espresso: Brewing Java For More Non-Volatility with Non-volatile Memory
Provide a general persistent heap design to manage persistent data in Java runtime, and a safe persistence programming model to persist application data with 256X speedup at best. |
| Sep 2016 - Dec 2016 | Tiger Programming Language Compiler
Implement a compiler that compiles Tiger language into X86 assemble code, according to <i>Modern Compiler Implementation in C</i> , Andrew W Appel. |
| Jul 2016 - Aug 2016 | JOS: An Exokernel Lab
Implement booting, memory management, user environments, and preemptive multitasking of an exokernel-like system, according to the course lab from MIT 6.828 <i>Operating System Engineering</i> . |
